Weekly Report

A general monthly meeting was called by Manger Mr. Arpan on Monday. The meeting centred around the work activities of KAS and follow ups.

After the meeting , there was an Animal Birth Control Programme at KAS where many owned and community dogs were ligated.

We are very grateful to people who offer help to animals in whatever way possible. As it is winter, some of the people have been kind enough to help the sheltered animals with sheets , heater and water bags. Thanks to people like Eden, Bandana , Deep and many more.

The Animal clinic has been attending to regular follow up cases and new cases of dogs with the viral illness - canine Parvovirus and Distemper. The cases are rising and in the morning mostly, the clinic is full of patients.

A dog with a cherry eye was brought from a neighbouring city, Siliguri. Dr. Deo has seen the dog and a small surgery was done. Vet Deo has suggested follow ups on his eye via phone. He will check upon the dog again when he and team go to Siliguri next week to conduct an Animal Birth Control camp.

Dog with a cherry eye- Before and after surgery

The team has been going on rescues when there is a call. A few of the dogs have been rescued the week - two accident cases and one has been rescued for spaying.

Rescues

Two mother dogs have been surrendered to KAS along with their puppies this week. One of the puppies has already got adopted and we are hoping others will find a Home too. These mother dogs will be spayed at KAS thereafter.

A local news channel, KTV visited Kalimpong to take a brief interview with Dr. Deo on the ongoing outbreak of viral disease - canine Parvovirus and Distemper. It is basically to generate awareness amongst the general public for keeping their dogs safe from such viruses.

Dr. Deo ready for the interview with KTV

On Saturday, Mr. Arpan , Dr. Deo and Yogita visited the sister shelter - Darjeeling Animal Shelter. This was a monthly visit.

New rescued puppies are now given shelter at DAS. We have put them for adoption. Many of these puppies are with rickets. Vet. Dr. Mihir has been giving them supplements to help these puppies with bowed legs.

Other rescue dogs are caught and brought in for spaying / neutering. The DAS team has been following with the ward wise Anti-rabies vaccination.

Darjeeling Shelter too has been seeing many cases of Parvo and Distemper and the team has been attending to such cases and treating them.

Dr. Deo and Furmit are seen in the corner and Mr. Naren is seen monitoring the dog along with Vet. Mihir

One of the oldest rescues, Cricket has crossed the rainbow bridge. And it pains us to not see Cricket with her wagging tail and her teddy bear looks. She was one of the pampered shelter dogs at Darjeeling Animal Shelter. She passed away a week ago after suffering from geriatric illness. She was 14. She came to DAS when she was only a few weeks old.

Darjeeling Animal Shelter is going in full swing with their daily activities and lots of vaccination and rescues.

Cricket is gone but not forgotten

Thank you to all our donors, Mm. Janine, **Animaux Secours** for supporting Kalimpong Animal Shelter. **One Voice, Working for Animals, Dogs Trust, Animal Protection Network, Sweden** for supporting the sister Darjeeling Animal Shelter.
