

THE MONTHLY REPORT - DARJEELING ANIMAL SHELTER

ANIMAL BIRTH CONTROL PROGRAMME

This month, our team successfully conducted ABC procedures on 26 animals under the Dogs Trust project. Additionally, 56 dogs were inoculated against rabies. ABC and ARV are crucial components of our efforts to control the population of stray animals and reduce instances of overpopulation in our area.

TRAINING ACHIEVEMENTS

The DAS team completed their training on Animal Birth Control Surgery at the renowned WVS Hicks International Training Centre. It was a 12-day program held in Goa starting from 15th April to 26th April, 2024. The Shelter Vet Dr. Mohit and compounder Reewaj successfully completed the Training Program, and they are now ready to integrate their expertise and experience into our shelter's operations.

BRAIN SAMPLE TESTING BY DR. MIHIR

Dr Mihir Mazagonkar has conducted the 'Sample Brain Testing' demonstration for participating for World Veterinary Science (WVS) taskforce Training Programme in Siliguri.

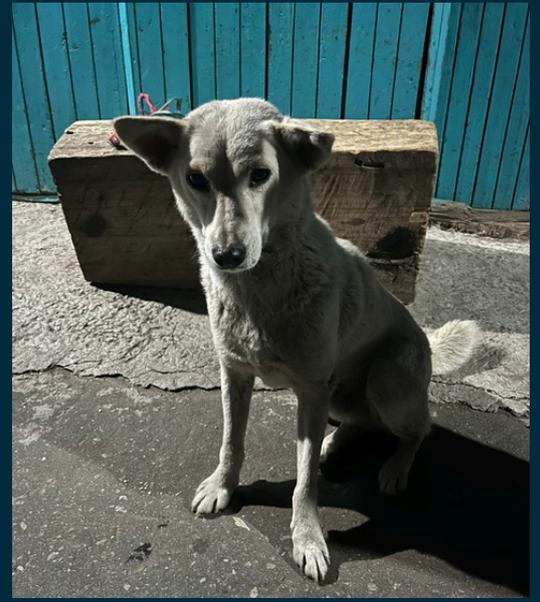

ABC CAMP AT RIMBICK

On 23rd April, the Darjeeling Animal Shelter team organized and conducted an ABC camp at Rimbick in Darjeeling where 48 dogs were sterilized by Dr. Shuvani assisted by the team in April. About 57 dogs also received their vaccination against rabies for the well-being of animals and the community.

These camps are essential in reaching a larger number of animals efficiently, ensuring that more animals receive the necessary procedures to control their population.

RESCUE OPERATIONS

During April, we successfully rescued 19 animals. Our rescue operations are vital in providing immediate care and shelter to animals in distress or need of medical attention. Similarly, ten dogs were returned to their same location after their healing and recovery. The dogs were happy to be released in good shape and live their normal lives, free and happy.

ADOPTIONS

Good news that 5 animals found their loving homes. The team ensured they were in good health for adoption. Adoption is a key part of our mission to find permanent and caring homes for animals under our care, providing them with a chance for a better life.

OPD (OUTPATIENT DEPARTMENT)

OPD Cases were quite high this month with over 443 cases, well-handled by Dr. Mohit.

The cases included medical consultations, treatments, and follow-ups on animals.

Overall, April was a productive month for our organization, with significant progress made across various areas of our operations. We remain committed to our mission of animal welfare, health, and population control, and we look forward to continued success in the coming months.

We extend our heartfelt gratitude to all our dear Patrons, donors, and supporters. Your invaluable contributions empower us to make a tangible difference in the lives of animals, enabling us to provide essential care, medical treatments, and advocacy.
