Rabies positive LFA test

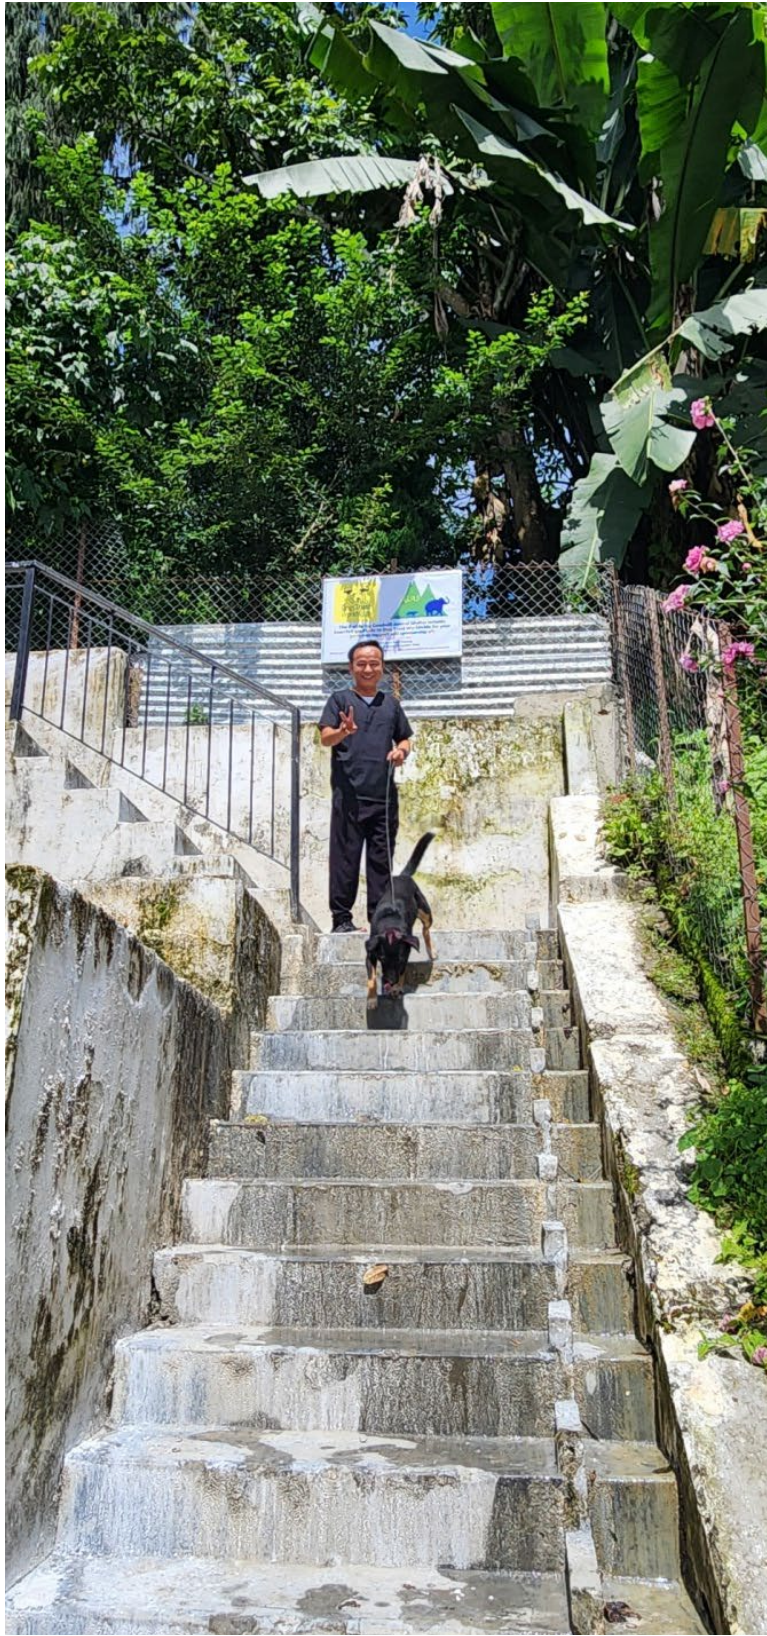

Putting up of sign board thanking DTW for sponsoring the fencing of recreation area and gate of rabies kennels

Staff getting FRDs ready for release after neutering

DAS staff out to release FRD post ABC

Proposed to conduct refresher sessions bi-monthly by each vet at the shelter to update and upgrade the whole DAS team to better serve our in/out patients which was well received by the administration.

On 23rd July 2024 we conducted our first official refresher session on “surgical scrubbing, surgical gloving, consent and surgical form fill up”.

Refresher Session

Surgical scrubbing

Surgical gloving

Consent and surgical record form fill up

[Resource person: Dr. Shivani Pradhan
(Senior Vet Surgeon cum DTW ABC Project Coordinator)
Date: 23rd July 2024
Time: 2:00pm

Packing surgical kit for next day OT

Using shelter bike for the first time to take a rescue patient for X-ray

2.	Castration	19
3.	Spay	27
4.	Cryptochid	0
5.	Deaths	0
6.	Postmortem if dead	0

Attended Association for Prevention and Control of Rabies in India (APCRI) Conference 2024 at Bhubaneswar, Odisha

One with Dr. Sumit Poddar

Our research paper, “**One Health Approach for Rabies Free Mirik**” was accepted for oral presentation at APCRICON 2024 through which we showed that **Zero by 2030 is possible in collaboration with the government, animal and human NGOs, self help groups, media and community participation.**

Here we realized that many medical professionals and other participating parties' feel that dogs are the sole culprits. So, we took this opportunity to pass on the truth that **“Mad dog is a disease and dogs are also a victim, not the villain.”**
